a The four arms (§2.1)
Exact
No fill
Identity
RidgeFill
tail
late
lower
every row, every layer
late layers write nothing for the prefix
late inputs copied from x_S (POP's fill)
late inputs predicted from x_S
b Controls in the reference study (§3.3)
+ rows
+ random rows
+ longer tail
No fill + longer tail
rows chosen by attention run exactly
same number of rows, chosen at random
same number of rows added to the tail
tail lengthened until it costs as much as the fill
computed exactly
ridge-map fill
identity fill
nothing written
