a The four arms (§2.1)
Exact
tail
late
lower
every row, every layer
No fill
tail
late layers write nothing
for the prefix
Identity
tail
late inputs copied from x_S
(POP's fill)
RidgeFill
tail
late inputs predicted from x_S
b Controls in the reference study (§3.3)
+ rows
tail
late
lower
rows chosen by attention
run exactly
+ random rows
tail
same number of rows,
chosen at random
+ longer tail
tail
same number of rows
added to the tail
No fill + longer tail
tail
tail lengthened until it
costs as much as the fill
computed exactly
ridge-map fill
identity fill
nothing written
