Base rules: used only to set the count
half of the protected-class matches
every digit token
top 20 % of the prefix by lower-layer question attention
U
union
count N
× 1.0
N exact prefix rows, chosen by the probe
On the 27B timing prompts, N came to 28 to 31 % of the prefix.
lexical net
highest late-layer attention from the last 256 rows
reserved inside N, at most 5 % of the prefix
+ special tokens added on top, no cap
+ tail: last 4,096 tokens outside the count
